

Galaxies

TASK SHEET

YOU NEED TO

1. Look at your selection of galaxies and write down for each one if you think it is a spiral or elliptical, and whether you think it looks red or blue.

Spiral

2. Do any of your galaxy pictures look different? If so, write down anything different or special about them, and what it could mean.

3. Draw a chart to show how many blue spiral, red spiral, blue elliptical and red elliptical galaxies you have.

Elliptical

4. Plot your galaxies on the board, using the appropriate flag for spiral or elliptical galaxies.

5. Looking at your model, are the different types of galaxies spread out equally or are there more of one type in one area?
